

# HCA Connects With CommonWell and Carequality!

HCA Healthcare exchanges patient documents with CommonWell and Carequality, national Health Information Exchange providers. By connecting with both network, HCA maximizes the opportunity to both send and receive patient information from many sources.

## How do we Access?

The HIE Viewer can be launched by selecting a patient and clicking "HIE Clinical Viewer". In Meditech, the HIE Viewer hovers above allowing quick access to patient notifications.

## Who is Connected?

A full list of participants can be found at <https://carequality.org/active-sites-search/> and <https://www.commonwellalliance.org/who-is-connected/>

## How Does it Work?

When a patient is admitted to an HCA facility, HCA will query all Carequality & Commonwell participants for clinical information housed on that patient.

## What Information is Exchanged?

This includes, but is not necessarily limited, to:

- Demographics
- Encounters
- Vitals
- Conditions (problems and diagnoses)
- Allergies
- Medications
- Tests (lab, pathology, imaging)
- Immunizations
- Procedures
- Certain Clinical Documents
- Notes
